

IBM Proventia Management SiteProtector SP 7.0 helps provide management for network and host security at a lower cost

Description2
Prices3

Overview

The IBM Proventia Management SiteProtector SP 7.0 offers a comprehensive security management system that can grow in scale as your business grows. This low-cost system:

- Advances the usability of the management of IBM ISS security devices as well as integrating with existing systems within your infrastructure.
- Leverages the benefits of connecting to the IBM ISS Service Operations Center (SOC) event monitoring service and interfacing directly with the managed security services of IBM.
- Takes the burden of centrally managing, monitoring, and measuring enterprise security by assisting you with corporate and regulatory compliance in one easy to use management system.
- Provides for unified management of:
 - High-performance network security
 - Endpoint security including antivirus
 - Server security
 - Vulnerability management
 - Remote office security
 - Internal security
 - Mail security
 - Network traffic flow anomaly analysis
- Offers enhanced insight into which assets in your environment are at the highest levels of security risk.
- Integrates with existing workflow processes using active directory and ticketing systems such as Remedy.
- Eases the complexity of security policy management processes.

Availability date

June 17, 2008
